SUMMARY

Backend Developer with hands-on production experience building scalable systems using **NestJS, TypeScript, and PostgreSQL**. Maintains two live client-facing platforms with **99.9% uptime** at Softvence IT Ltd. Experienced with RESTful APIs, WebSocket, Stripe payment integration, and cloud deployment via **AWS and Docker**. Published researcher (Springer, 2024) with a BSc in CSE from Independent University Bangladesh.

TECHNICAL SKILLS

Languages	TypeScript, C-sharp, Python · Java · SQL
Frameworks and DB	NestJS, Next.js, Express.js, PostgreSQL, MongoDB, Prisma ORM
API And Auth	REST API, gRPC, WebSocket, WebRTC, JWT, OAuth2, RBAC, Swagger
DevOps and Testing Concepts	Git, AWS, CI/CD, Prisma ORM, System Design, Data Structures & Algorithms Microservices, System Design, DSA, Agile/Scrum. Unit, Integration, e2e Testing

PROFESSIONAL EXPERIENCE

Backend Developer
Softvence IT Ltd

Nov 2025 – Present
Dhaka, Bangladesh

- Engineered and maintained two live production systems — **childcareregister.com** and **readytoworkapp.com** — serving **500+ active users** with **99.9% uptime** on AWS.
- Designed and delivered **30+ REST API endpoints** secured with JWT, OAuth2, and multi-tier RBAC, reducing unauthorized access incidents to zero.
- Built real-time **chat and notification system** using WebSocket (Socket.io) and bullMQ cutting notification delivery latency by **~60%** versus polling.
- Integrated **Stripe payment processing** handling end-to-end transaction flows; wrote unit and integration tests using **Jest** achieving **80%+ code coverage**.
- Containerized services with **Docker** and configured **CI/CD pipelines**, reducing deployment time by **40%** and enabling zero-downtime releases.
- Collaborated in a cross-functional agile team (frontend, UI/UX, AI) delivering **3 sprint releases** on schedule.

SELECTED PROJECTS

Poultry Supply Chain Management System

Aug – Oct 2025

Key tech: NestJS, Next.js, TypeScript, PostgreSQL, Prisma, JWT [Source Code]

- Built full-stack platform digitizing end-to-end poultry operations for **3 user roles** (farmer, distributor, admin), reducing manual order processing by **~70%**.
- Designed normalized PostgreSQL schema with **12+ relational tables**, supporting stock tracking, order management, and delivery modules.

Real-Time Chat & Notification Service

2025

Key tech: NestJS, TypeScript, WebSocket (Socket.io), PostgreSQL, JWT [Source Code]

- Architected WebSocket-powered messaging service with **multi-room chat, read receipts, and push notifications**, tested with Jest to **85% coverage**.
- Designed event-driven architecture with JWT-authenticated Socket.io connections, supporting **concurrent sessions**.

KEY ACHIEVEMENTS

- Production Uptime:** Maintained **99.9% uptime** across two live client-facing systems using AWS, Docker, and automated CI/CD at Softvence IT Ltd.
- Research & Leadership:** Led a team of 4; published Springer paper (2024) on a **Supply Chain Management System for Agribusinesses** — ERD and relational schema design.
- Hackathon:** Designed a supply chain prototype at **HackNSU Season 5** for RMG sector optimization.

EDUCATION & CERTIFICATIONS

BSc in Computer Science and Engineering — Independent University Bangladesh, Dhaka

Sep 2021 – Dec 2025

Introduction to Networks — CISCO (L2/L3 config, IPv4/IPv6, network security)

2024
